2025-01-23 Meeting notes

📅 Date 🔗

Jan 23, 2025

First team meeting.

Agenda 🔗

- Decide on the project concept
- Agree on technologies
- Agree on tasks
- Decide on how to work Agile

Discussion & Decisions 🔗

Project Concept 🔗

- Still some debate; several options, need final decision.

Technologies 🔗

- **Backend**:
  - Python + Django (everyone already comfortable, lower learning curve).
- **Frontend**:
  - React, TypeScript, Vite.
  - Testing with TypeScript + Jest from the start.
  - Use a CSS framework (to be decided).
- **Rust**:
  - Interesting but deemed too challenging to learn in this context.
- **Backend Testing**:
  - Custom tests in Python (e.g., Django test framework or pytest).
- **Project Management**:
  - Use Jira to keep track of project and sprint backlogs.

Agile Approach 🔗

- One rotating "lead" (or "scrum master") each iteration to delegate tasks.
- A different "secretary" at each meeting to take notes.

Hosting 🔗

- Max can provide hosting if desired.

Agreement 🔗

- Use **Django** for the backend.
- Start first sprint on **Monday, 26.01.25**, after finalizing the project concept.

Next Week 🔗

1. Finalize the project idea.

2. Kick off the first sprint.

3. Delegate tasks to each team member.
